

SECTION I — CASH-VALUE LIFE INSURANCE

(Foundation Asset | Guaranteed Growth | No Roll)

GLOBAL LIFE INSURANCE RULES (APPLY TO ALL TIERS)

- **Purchase Method:** CASH ONLY
-  No dice rolls
-  No loans or financing
- Guaranteed growth **every time the player completes a lap**
- **Both values grow together:**
 - Face Amount
 - Max Borrowable Cash Value
- Player may **borrow against cash value at any time**
- Borrowing does **not** stop growth
- These cards are **permanent assets** (not consumable)

GLOBAL GROWTH MECHANIC

On every completed lap:

```
face_amount = face_amount × 1.25
max_cash_value = max_cash_value × 1.25
```

BORROWING LOGIC

```
available_to_borrow =
current_max_cash_value - outstanding_policy_loans
```

LIFE INSURANCE — TIER A

Card ID: INV_LIFE_INSURANCE_TIER_A
Name: Cash-Value Life Insurance — Tier A

LIFE INSURANCE — ENDGAME DISPLAY

For each policy:

Policy Tier
Current Face Amount
Current Max Borrowable Cash Value
Outstanding Policy Loans
Net Available Liquidity

Aggregate:

Total Life Insurance Face Amount
Total Policy Liquidity

SECTION II — DEFERRED INCOME ANNUITIES

(Guaranteed Income | Patience-Based | No Roll)

GLOBAL ANNUITY RULES (APPLY TO ALL TIERS)

- **Purchase Method:** CASH ONLY
 - **✗** No dice rolls
 - Requires **waiting period (laps)** before payouts begin
 - Once matured:
 - Pays **guaranteed income every lap**
 - Player may **surrender at any time**
 - Surrendering **before maturity = loss**
 - Surrendering **after maturity = discounted exit**
-

MATURITY BY TERM

Annuity Term Laps Required to Mature

5-Year	1 Lap
10-Year	2 Laps
15-Year	3 Laps
20-Year	4 Laps

PAYOUT RULE (POST-MATURITY)

`per_lap_payout = purchase_cost × 0.50`

SURRENDER RULE (FINAL)

```
if surrendered AND matured == false:
    surrender_value = purchase_cost × 0.50
    surrender_loss = purchase_cost - surrender_value
else if surrendered AND matured == true:
    surrender_value = purchase_cost × 0.80
```

● ANNUITY — 5 YEAR

Card ID: INV_ANNUITY_TIER_5Y

Name: Deferred Income Annuity — 5 Year

 - `impenetrable_wealth_component`
-

ANNUITY — ENDGAME DISPLAY

Per annuity:

Annuity Term
Purchase Cost
Matured (Yes/No)
Per-Lap Payout
Total Income Earned
Surrender Value (if applicable)
Surrender Loss (if applicable)

Aggregate:

Total Guaranteed Income Per Lap
Total Annuity Income Earned
Total Surrender Losses

SECTION III — WHY THIS STRUCTURE WORKS

- **Life Insurance** = foundation & liquidity
- **Annuities** = patience & income certainty
- No randomness → clear learning outcomes
- Laps = time (intuitive for players)
- Massive endgame reflection value
