

Locked in 

- **Name (exact): Coach JBo**
- **Eligibility gate: Group Mode + 4+ players**
- **Awarding rule: Only ONE player per group** gets it — the **closest match** to the Coach JBo conservative sequence/playstyle.

Below is a **developer-ready spec** that matches what you described (sequence-based, conservative, “defense-first”), and also handles the “closest to it” requirement cleanly.

Coach JBo Unlock System

1) Visibility + Evaluation Gate

Coach JBo is **hidden** and is only evaluated if:

```
gameMode === "Group" && totalPlayers >= 4
```

If not eligible:

- Coach JBo is not shown anywhere
 - Coach JBo scoring is not computed
-

2) Required Playstyle Model

Categories needed (tag your cards/spaces)

Your app needs each acquisition to have a `categoryTag` (can be stored in the card database):

- `PROTECTION` (Disability Insurance, Liability Insurance, Life Insurance, Emergency Fund)
- `REAL_ESTATE`
- `FINANCIAL` (Stocks/Bonds/Mutual Funds/Index Funds type investments)
- `BRAND` (Marketing, content, agency, promo investments)
- `LUXURY` (Luxury cards)

Also add a **subtag** for certain luxury that’s “basic brand-supportive”:

- `BASIC_BRAND_LUXURY` (Vehicle, “brand utility” items)
- `FLEX_LUXURY` (non-essential luxury)

(If you don't want subtags, we can do it with a single LUXURY rule, but subtags make your intent precise.)

3) “Closest Match” Scoring (Only One Winner)

Instead of a strict pass/fail, we compute a **Coach JBo Match Score** for each player. Highest score wins and unlocks **Coach JBo**.

The philosophy encoded

1. **Defense first (first 2–3 investment actions)**
 2. **Real Estate starts the portfolio**
 3. **Then financial instruments**
 4. **Brand/marketing after the foundation**
 5. **Luxury is allowed but should be basic/brand-supportive and not early**
-

4) Scoring Rules (Developer-Ready)

Assume we have a time-ordered list of acquisitions per player:

```
acquisitions[] = [{turnIndex, type: "INVESTMENT"|"LUXURY", categoryTag, subTag}]
```

We score like this:

A) Defensive Foundation (first 3 INVESTMENT acquisitions)

Let:

- `firstInvestments = first 3 items where type=="INVESTMENT"`

Points:

- +30 if **at least 2** of the first 3 are `PROTECTION`
- +15 if **exactly 1** of the first 3 is `PROTECTION`
- +0 if **0** protection in first 3

Bonus:

- +10 if the **first** investment is `PROTECTION`

B) Real Estate Before Financial/Brand

Let:

- `firstRealEstateIndex` = first occurrence of `REAL_ESTATE`
- `firstFinancialIndex` = first occurrence of `FINANCIAL`
- `firstBrandIndex` = first occurrence of `BRAND`

Points:

- +25 if `REAL_ESTATE` happens **before** any `FINANCIAL` and before any `BRAND`
- +10 if `REAL_ESTATE` happens before `BRAND` but after `FINANCIAL`
- +0 if no real estate at all

C) Financial Instruments After Real Estate

Points:

- +15 if the player has at least one `FINANCIAL` acquisition **after** their first `REAL_ESTATE`
- +5 if they have financial but **no** real estate (still something, but not Coach)

D) Luxury Timing (No early flex)

Let:

- `firstLuxuryIndex` = first occurrence of `type=="LUXURY"`
- `foundationCompleteIndex` = the later of (first `PROTECTION`, first `REAL_ESTATE`)

Penalty:

- -30 if any luxury occurs **before** `foundationCompleteIndex`
- -10 if luxury occurs early but it's only `BASIC_BRAND_LUXURY` (vehicle-type)

E) Luxury Type (basic vs flex)

If using subtags:

- +10 if their luxury is **only** `BASIC_BRAND_LUXURY`
- -15 if they have **2+** `FLEX_LUXURY` items

(If you skip subtags, we'll replace this with a spend ratio rule.)

F) Spend Balance (optional but strong)

If you track totals:

- +10 if `totalInvestmentSpend` $\geq$ `totalLuxurySpend`

- -10 if `totalLuxurySpend > totalInvestmentSpend`
-

5) Winner Selection (Only One Per Group)

After scoring everyone (only in eligible group games):

- Select the player with the **highest CoachJBoMatchScore**
- That player's end-game avatar reveal becomes: **Coach JBo**
- Everyone else gets their normal avatar logic

Tie-breakers (in order)

1. Higher number of PROTECTION acquisitions in first 3 investments
 2. Earlier REAL_ESTATE acquisition
 3. Higher careerPoints (if you want Coach to favor development)
 4. Higher finalNetWorth (last resort)
-

6) Developer Output Contract (What to store)

For each player at end of game:

```
{
  "coachJBoEligible": true,
  "coachJBoMatchScore": 85,
  "coachJBoReasons": [
    "Defense-first: 2 of first 3 investments were Protection",
    "Real Estate started portfolio before Financial/Brand",
    "No luxury before foundation"
  ]
}
```

And for the match:

```
{
  "coachJBoUnlockedPlayerId": "player_3",
  "coachJBoUnlockedName": "Coach JBo"
}
```

7) Display Requirements (Name + Styling)

Correct display string: Coach JBo
